Children & Young People’s Mental Health and Wellbeing
South Tees Transformation Plan

1 Introduction

1.1 This document sets out the Five-year Children and Young Peoples Mental Health and Wellbeing Plan for South Tees, in line with the national ambition and principles set out in Future in Mind – Promoting, protecting and improving our children and young people’s mental health and wellbeing.1

1.2 A requirement of Future in Mind is for areas to develop a local plan focused on improving access to help and support when needed and improve how children and young people’s mental health services are organised, commissioned and provided.

1.3 In response, the South Tees Children and Young People’s Mental Health and Wellbeing Transformation Plan 2015-20 has been developed; building on the foundations of the previous Tees-wide Children and Adolescent Mental Health Services (CAMHS) transformation work.

1.4 As this document incorporates Child and Adolescent Mental Health Services (CAMHS); it should be seen as the local ‘CAMHS strategy’.

2 What is the Children and Young People’s Mental Health and Wellbeing Transformation Plan?

2.1 The transformation plan provides a framework to improve the emotional wellbeing and mental health of all children and young people across South Tees. The aim of the plan is to make it easier for children, young people, parents and carers to access help and support when needed and to improve mental health services for children and young people.

2.2 The plan sets out a shared vision, high level objectives, and an action plan which takes into consideration specific areas of focus for local authority areas.

2.3 Successful implementation of the plan will result in the following outcomes:

- An improvement in the emotional wellbeing and mental health of all children and young people;
- Multi-agency approaches to working in partnership, promoting the mental health of all children and young people, providing early intervention and also meeting the needs of children and young people with established or complex problems;
- All children, young people and their families will have access to mental health care based upon the best available evidence and provided by staff with an appropriate range of skills and competencies.

1 Department of Health NHS England (2015) Future in Mind – Promoting, protecting and improving our children and young people’s mental health and wellbeing
2.4 This plan has been developed by a multi-agency group and builds the Teesside CAMHS work. Stakeholders consulted in the development of the plan are listed in Appendix 1.

2.5 The plan has been informed by health needs assessment within each local authority area.

3 National Policy Context

3.1 National policy over recent years has focussed on improving outcomes for children and young people by encouraging services to work together to protect them from harm, ensure they are healthy and to help them achieve what they want in life.

3.2 In regard to improving outcomes for children and families, *No Health without Mental Health*\(^2\) published in 2011, emphasises the crucial importance of early intervention in emerging emotional and mental health problems for children and young people. Effective commissioning will need to take a whole pathway approach, including prevention, health promotion and early intervention.

3.3 *Future in Mind – Promoting, protecting and improving our children and young people’s mental health and wellbeing*, responds to the national concerns around provision and supply of system wide services and support for children and young people. It largely draws together direction of travel from preceding reports, engages directly with children young people and families to inform direction and the evidence base about what works.

3.4 The report introduction includes a statement from Simon Stevens CEO of NHS England he stated ‘Need is rising and investment and services haven’t kept up. The treatment gap and the funding gap are of course linked’. The report emphasises the need for a whole system approach to ensure that the offer to children, young people and families is comprehensive, clear and utilises all available resources.

3.5 The joint report of the Department of Health and NHS England sets out the national ambitions that the Government wish to see realised by 2020. These are:

i. People thinking and feeling differently about mental health issues for children and young people, with less fear and discrimination.

ii. Services built around the needs of children, young people and their families so they get the right support from the right service at the right time. This would include better experience of moving from children’s services to adult services.

iii. More use of therapies based on evidence of what works.

iv. Different ways of offering services to children and young people. With more funding, this would include ‘one-stop-shops’ and other services where lots of what young people need is there under one roof.

---

\(^2\) No Health without Mental Health (2011) HM Government
v. Improved care for children and young people in crisis so they are treated in the right place at the right time and as close to home as possible. For example no young person under the age of 18 being detained in a police cell as a 'place of safety'.

vi. Improving support for parents to make the bonding between parent and child as strong as possible to avoid problems with mental health and behaviour later on.

vii. A better kind of service for the most needy children and young people, including those who have been sexually abused and/or exploited making sure they get specialist mental health support if they need it.

viii. More openness and responsibility, making public numbers on waiting times, results and value for money.

ix. A national survey for children and young people’s mental health and wellbeing that is repeated every five years.

x. Professionals who work with children and young people are trained in child development and mental health, and understand what can be done to provide help and support for those who need it.

3.6 *Future in Mind* identifies key themes fundamental to creating a system that properly supports the emotional wellbeing and mental health of children and young people. The themes are:

- Promoting resilience, prevention and early intervention
- Improving access to effective support – a system without tiers
- Care for the most vulnerable
- Accountability and transparency
- Developing the workforce

3.7 The report further sets out 49 recommendations that, if implemented, would facilitate greater access and standards for Children and Adolescent Mental Health Services (CAMHS), promote positive mental health and wellbeing for children and young people, greater system co-ordination and a significant improvement in meeting the mental health needs of children and young people from vulnerable backgrounds.

3.8 One of the recommendations is specific to implementing the *Crisis Care Concordat*[^3] – an agreement between police, mental health trusts and paramedics to drive up standards of care for people, including children and young people experiencing crisis such as suicidal thoughts or significant anxiety.

3.9 *Future in Mind* also makes reference to the Children and Young People’s Improving Access to Psychological Therapies programme (CYP IAPT). This is a service transformation programme delivered by NHS England that aims to improve existing Child and Adolescent Mental Health Services (CAMHS) working in the community[^4]. The programme works to transform services provided by the NHS and partners from Local Authority and Third Sector that together form local area CAMHS Partnerships. It is different to Adult IAPT as it does not create standalone services. The programme...

[^3]: HM Government Mental Health Crisis Concordat: Improving outcomes for people experiencing mental health crisis
[^4]: Children and Young People’s Improving Access to Psychological Therapies Programme
began in 2011 and has a target to work with CAMH services that cover 60% of the 0-19 population by March 2015.

4 Local Policy Context

4.1 This transformation plan contributes to the delivery of local priorities detailed within Joint Health and Wellbeing Strategies.

4.2 The Middlesbrough Joint Health and Wellbeing Strategy aims to ensure children and young people have the best health and wellbeing. Specific priorities include: early help with focus on the family; supporting emotional health and wellbeing of young people and their family; and improving maternal health and early years health and wellbeing outcomes.

4.3 A key priority in the Redcar and Cleveland Joint Health and Wellbeing Strategy is to ensure children and young people to have the best start in life. This includes children, young people and families being supported through integrated prevention and early intervention programmes, and improving maternal and early years’ health and wellbeing.

4.4 The transformation plan also aligned with the NHS South Tees Clinical Commissioning Groups Clear and Credible Plan 2012-17, which acknowledges the need to focus on children and young people, particularly those in vulnerable groups (children in care, care leavers, children with special needs) and developing commissioning intentions.

4.5 Delivery of this plan will also support the Clinical Commissioning Groups Mental Health Strategy 2015/20, and will align with the developing Joint Strategy for Autism Spectrum Disorders.

5 Children and Young People’s Mental Health; National Profile of Need

5.1 Mental health problems cause distress to individuals and all those who care for them. Mental health problems in children are associated with underachievement in education, bullying, family disruption, disability, offending and anti-social behaviour, placing demands on the family, social and health services, schools and the youth justice system. Untreated mental health problems create distress not only in the children and young people, but also for their families and carers, and the wider community, continuing into adult life and affecting the next generation.

5.2 Information in key policy documents suggests:

- 1 in 10 children and young people aged 5 - 16 suffer from a diagnosable mental health disorder;
- Between 1 in every 12 and 1 in 15 children and young people deliberately self-harm;
• More than half of all adults with mental health problems were diagnosed in childhood - less than half were treated appropriately at the time;
• Number of young people aged 15-16 with depression nearly doubled between 1980s and 2000s;
• Proportion of young people aged 15-16 with a conduct disorder more than doubled between 1974 and 1999;
• 72% of children in care have behavioural or emotional problems;
• About 60% looked after children in England have emotional and mental health problems and a high proportion experience poor health, educational and social outcomes after leaving care;
• 95% of imprisoned young offenders have a mental health disorder.

5.3 Just like adults, any child can experience mental health problems, but some children are more vulnerable to this than others. These include those children who have one or a number of risk factors:

- who are part of the Looked after system
- from low income households and where parents have low educational attainment
- with disabilities including learning disabilities
- from Black, Minority, Ethnic (BME) Groups including Gypsy Roma Travellers (GRT)
- who identify as Lesbian, Gay, Bisexual or Transgender (LGBT)
- who experience homelessness
- who are engaged within the Criminal Justice System
- whose parent(s) may have a mental health problem
- who are young carers
- who misuse substances
- who are refugees and asylum seekers
- who have been abused, physical and/or emotionally

6 Children and Young People’s Mental Health; Local Profile of Need

6.1 The following data is taken from the Child and Maternal Health Intelligence Network Service (CHIMAT) Local Authority Service Snapshots - CAMHS reports (2014). The reports bring together key data and information to support understanding key local demand and risk factors to inform planning.

6.2 Tabled below is the 0 to 19 years population for both Middlesbrough and Redcar and Cleveland.

<table>

</tr>
</tbody>
</table>

5 Better Mental Health Outcomes for Children and Young People A RESOURCE DIRECTORY FOR COMMISSIONERS
6 National Child and Maternal Health Intelligence Network (2015)
### 6.3
CHIMAT estimate that within Middlesbrough there were 2,150 children and young people of school age who had a mental health condition during 2014; in Redcar and Cleveland this figure is 1,850. The table below shows estimated number of children with a mental health disorder by group between ages of 5 and 10 years and 11 to 16 years old during 2014.

<table>
<thead>
<tr>
<th></th>
<th>Estimated number of children aged 5-10 years with mental health disorder</th>
<th>Estimated number of children aged 11-16 years with mental health disorder</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Middlesbrough</td>
<td>925</td>
<td>1,230</td>
<td>2,150</td>
</tr>
<tr>
<td>Redcar and Cleveland</td>
<td>755</td>
<td>1,100</td>
<td>1,850</td>
</tr>
</tbody>
</table>

**Source:** Local authority mid-year resident population estimates for 2014 from Office for National Statistics. CCG population estimates aggregated from GP registered populations (Oct 2014).

### 6.4
Estimated prevalence of children and young people mental health disorders could include conduct, emotional, hyperkinetic and less common disorders\(^7\). The graph below shows the estimated prevalence of children with conduct, emotional, hyperkinetic and less common disorders by locality. It should be noted that some children and young people may be diagnosed with more than one mental health disorder.

\(^7\) National Child and Maternal Health Intelligence Network (2015)
6.5 The most common mental health disorders in children and young people in both localities are conduct disorders. Each of the areas have specific challenges that are not causal of mental health difficulty but can be described as increasing an individual's risk of mental or emotional health problems.

6.6 Many parts of South Tees are affected by deprivation which has a direct impact on child poverty figures. The level of child poverty can vary from ward to ward within a local authority area. Mid-2012 estimates of the number of children in poverty show:

<table>
<thead>
<tr>
<th></th>
<th>Middlesbrough</th>
<th>Redcar &amp; Cleveland</th>
</tr>
</thead>
<tbody>
<tr>
<td>37.0% in poverty</td>
<td>29.0% in poverty</td>
<td></td>
</tr>
<tr>
<td>61.1% in Thorntree</td>
<td>62.6% in Grangetown</td>
<td></td>
</tr>
<tr>
<td>8.8% in Nunthorpe</td>
<td>10.0% in West Dyke</td>
<td></td>
</tr>
</tbody>
</table>

6.7 Key messages from the Children and Young Peoples Mental Health and Wellbeing Profiles (2014) for both localities include:

- Self-harm hospital admissions for self-harm (rate per 100,000 aged 10-24) are above the England average;

- Entry into youth justice system (rate per 1,000 aged 10-18) for both areas is 27.2; this being the highest in England;

- The Looked after Children rate (per 100,000) is 114 in Middlesbrough and 63 for Redcar and Cleveland. The average for England is 60.

6.8 Data from Public Health England 2013/14 indicated there were 355 Looked after Children in Middlesbrough and 175 in Redcar and Cleveland. The proportion of Looked after Children in secure units, children's homes and hostels was greater in Middlesbrough to that in Redcar and Cleveland (15.49% and 11.43% respectively).
In Teesside, about 2,000 young people aged 16-18 years are estimated to be not in education, employment or training (NEET). All Teesside local authorities have rates above the England average.

7 What Children and Young People have told us

7.1 From the national engagement exercise, children and young people have told us how they want things to change. They want:

- to grow up to be confident and resilient, supported to fulfil their goals and ambitions;
- to know where to find help easily if they need it and when they do to be able to trust it;
- choice about where to get advice and support from a welcoming place. It might be somewhere familiar such as school or the local GP; it might be a drop-in centre or access to help on line. But wherever they go, the advice and support should be based on the best evidence about what works;
- as experts in their own care, to have the opportunity to shape the services they receive;
- to only tell their story once rather than have to repeat it to lots of different people. All the services in their area should work together to deliver the right support at the right time and in the right place;
- if in difficulty, not having to wait until they are really unwell to get help. Asking for help shouldn’t be embarrassing or difficult and they should know what to do and where to go; and if they do need to go to hospital, it should be on a ward with people around their age and near to home. And while children and young people are in hospital, we should ensure they can keep up with their education as much as possible.

7.2 A recent local survey (April 2015) with children and young people aged 8-24 years around emotional health and wellbeing helped to shape South Tees Clinical Commissioning Groups priorities including:

- Offer young people emotional and mental health services we know will help them;
- Less children and young people will self-harm and use alcohol;
- Young people who get help from children’s mental health services will be helped by adult mental health services so they can continue to receive the help they need;
- Support pregnant women and new parents so they can give their baby the best start in life;
• Ensure those with complicated needs including mental health are given access to funding to support their needs through personal health budgets.

7.3 Examples for feedback gathered as part of the survey included;

• Make it (Mental Health) less a taboo subject and raise more awareness of the support and help available;

• Provide more services to help support individuals and guide them in the right direction;

• There is a need for more counsellors;

• More staff are needed to stop waiting lists and get people seen.

7.4 As part of the Middlesbrough HeadStart Lottery Bid, engagement with young people in Middlesbrough has highlighted;

• Young people don't want to be judged - they need to be sure that any person they seek support from inspire trust;

• Young people want services and support delivered at a time and in a location which is suited to them. This includes within the home, school and community;

• Peer support was seen as very important;

• Adaptation to young people’s environments was high on the agenda. For example more provision within school to chill out;

• Young people want to be involved in co-production of services and have choice over interventions;

• In terms of specific issues contributing to emotional stress, the pressure of school (transition and meeting targets), peers and social media were cited.

8 Commissioned Services

8.1 Although not an exhaustive list, the table below details some of the services commissioned for children and young people with emotional and mental health difficulties. Services are divided into tiers, reflecting level of specialist intervention (low at tier 1 and highest at tier 4).

| Universal (Tier 1) | ý Midwifery  
| ý Health Visiting  
| ý Children’s Services  
| ý School Nursing

</table>

8.2 Early Intervention in Psychosis, from 14 years plus; The Clinical Commissioning Group has already committed the nationally defined level of funding to the Service Provider in anticipation of the introduction of new access standards. National guidance, workforce requirements and gaps in delivering NICE concordant care are being collated to ensure national requirements are met from quarter 4 of 2015/16.

8.3 Children and Adolescent Mental Health (CAMHS) and Liaison Services; National guidance around the delivery of all-age 24/7 Liaison Services has been received. Currently the CAMHS Liaison service is funded non-recurrently and separately to the Adult Service. The national funding available (across all ages) is shown below in section 9 and will be used to ensure compliance with national requirements in advance of the introduction of access standards. This is likely to primarily feature the integration of Children and Young People and Adult Services into a 24/7 provision. Further analysis and planning is required to review current gaps in provision against the national standards and develop the required plans for assurance.

8.4 Urgent and Emergency Care Vanguard Sites; South Tees Clinical Commissioning Group is part of a regional Urgent and Emergency Care Network Vanguard. Vanguard Sites have committed to incorporate Mental Health Crisis as part of their work and will be testing and evaluating all-age models of liaison mental health. These models and development will be covered by a “central oversight” support team.
9 Baseline access, waiting time, workforce and in-patient data

9.1 There is one main NHS provider for children and young people in South Tees. Tees, Esk and Wear Valleys (TEWV) NHS Foundation Trust provide CAMHS and Eating Disorder Services.

9.2 In the spirit of transparency, baseline data to inform this plan have been provided, as detailed below;

10 Children and Young Peoples Improving Access to Psychological Therapies (IAPT) Programme status

10.1 The national service transformation programme delivered by NHS England aims to improve existing Children and Adolescent Mental Health Services (CAMHS) working in the community, involving the NHS and partners from the local authority and voluntary and community sector that together form local area CAMHS Partnerships.

10.2 There has been local involved with the Children and Young People’s Improving Access to Psychological Therapies Programme (CYP IAPT) as part of the North East Learning Collaborative.

10.3 The map below indicates timelines for Middlesbrough and Redcar and Cleveland, both sitting in the geography of South Tees Clinical Commissioning Group.
10.4 As part of the programme Routine Outcome Monitoring is being rolled out to Children and Adolescent Mental Health Service (CAMHS) teams to help improve the quality and experience of services for children and young people. More information is available at www.cypiapt.org

11 Analysis of Need, Gaps and Issues

11.1 Completion of the self-assessment tool, although a subjective exercise, has provided a picture of how ready partners across South Tees are to deliver recommendations detailed within Future in Mind.

11.2 The graphs below will summarise the current local position;

![Readiness Status](image1)

![Readiness by Theme](image2)
11.3 Within the Self-assessment against the 49 recommendations within *Future in Mind* the following areas have been identified as “Not Ready”;

<table>
<thead>
<tr>
<th>Recommendation Number and Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>11. Extending use of peer support networks for young people and parents based on comprehensive evaluation of what works, when and how.</td>
</tr>
<tr>
<td>18. Enabling clear and safe access to high quality information and online support for children, young people and parents/carers, for example through a national, branded web-based portal.</td>
</tr>
<tr>
<td>21. Commissioners and providers across education, health, social care and youth justice sectors working together to develop appropriate and bespoke care pathways that incorporate models of effective, evidence-based interventions for vulnerable children and young people, ensuring that those with protected characteristics such as learning disabilities are not turned away.</td>
</tr>
<tr>
<td>22. Making multi-agency teams available with flexible acceptance criteria for referrals concerning vulnerable children and young people. These should not be based only on clinical diagnosis, but on the presenting needs of the child or young person and the level of professional or family concern.</td>
</tr>
<tr>
<td>27. Improving the skills of staff working with children and young people with mental health problems by working with the professional bodies, NHS England, PHE and HEE, to ensure that staff are more aware of the impact that trauma has on mental health and on the wider use of appropriate evidence-based interventions.</td>
</tr>
<tr>
<td>30. Having lead commissioning arrangements in every area for children and young people’s mental health and wellbeing services with aligned or pooled budgets by developing a single integrated plan for child mental health services in each area, supported by a strong Joint Strategic Needs Assessment.</td>
</tr>
<tr>
<td>32. By co-commissioning community mental health and inpatient care between local areas and NHS England to ensure smooth care pathways to prevent inappropriate admission and facilitate safe and timely discharge.</td>
</tr>
<tr>
<td>34. By Ofsted and CQC working together to consider how to monitor the implementation of the proposals from this report in the future.</td>
</tr>
<tr>
<td>41. Implementing the recommendations of the Carter Review of Initial Teacher Training (ITT) to commission a sector body to produce a framework of core content for ITT which would include child and adolescent development.</td>
</tr>
<tr>
<td>42. By continuing investment in commissioning capability and development through the national mental health commissioning capability development programme.</td>
</tr>
</tbody>
</table>

11.4 We can identify examples of positive progress and investment in the South Tees area. In recent years we have already seen the following:

- Delivery of the BOND (Better Outcomes, New Delivery) programme, funded by the Department for Education to build capacity in schools to commission emotional health and well-being services from the voluntary and community sector. This resulted in schools developing a shared needs assessment based on a school survey;
- Stage 2 development of the HeadStart Lottery-funded programme, building on the work of BOND to improve the emotional resilience offer for 10-14 year olds in Middlesbrough through interventions in school, the community, at home and through digital media;
• Development in Redcar and Cleveland of a common framework for the procurement of counselling and emotional wellbeing interventions in schools;
• Embedding of specialist CAMHS workers in Looked after Children services;
• Implementation in 2015 of a South Tees specialist community perinatal mental health service;
• Launch of a CAMHS Crisis and Liaison Service.

12 Our Vision

12.1 The World Health Organization definition of mental health is ‘a state of well-being in which every individual realizes his or her potential, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to her or his community’.

12.2 This definition supports our overarching vision:

‘Children and Young People across South Tees will be supported to reach their potential and when faced with difficulties will have access to quality evidence based services’.

13 Shared Values and Principles

13.1 The plan is underpinned by the following set of principles which have been developed in partnership;

• Children, young people, their family/carers will be involved in future design of services;

• Building of capacity across the system to deliver evidence-based outcomes and focussed pathways is needed;

• Resilience will be built across the whole system;

• Resources should to be re-focused towards prevention and earlier intervention (whilst including consideration of, and adequate provision for, children and young people with identified mental health problems that require access currently to specialist mental health services);

• Reducing unmet need and increasing choice of, and access to, services for targeted and high risk groups;

• High quality, cost effective services, based in community settings (except for highly specialist clinical provision) and offering flexible provision to a wide range of needs and to the broad diversity of the population;
Clear service pathways between and within services will be developed in partnership and be communicated widely;

Services will adopt holistic, family centred approaches including the active participation of children and young people in developing solutions to their own needs, and in decisions around service planning and development;

Support for parents and carers from pre-birth onwards to better support their child’s emotional development in the early years of life will be prioritised within family and adult services;

Vulnerable groups, such as Looked After Children, neuro-behavioural issues, learning disability or victims of abuse, will have access the support they need;

‘No door is the wrong door’; and aspire towards ‘one child, one assessment, one plan’.

14 How are we going to achieve our vision?

14.1 The South Tees Transformation Plan has been developed to bring about a clear coordinated change across to the whole system pathway to enable better support for children and young people; realising the local vision.

14.2 A whole system approach to improvement has been adopted. This means health organisations, local councils, schools, youth justice and the voluntary sector working together with children, young people and their families.

14.3 Fundamental to the plan, is partnership working and aligned commissioning processes, to foster integrated and timely services from prevention through to intensive specialist care. Also through investing in prevention and intervening early in problems before they become harder and more costly to address.

14.4 The initial plan is based on Future in Mind and organised according to its five themes. The five themes and the aim of each theme (also from Future in Mind) are listed below.

<table>
<thead>
<tr>
<th>Resilience, prevention and early intervention</th>
<th>Improving access to effective support</th>
</tr>
</thead>
<tbody>
<tr>
<td>Our aim is to act early to prevent harm, by investing in the early years, supporting families and those who care for children and building resilience through to adulthood. Strategies should be developed in partnership with children and young people to support self-care. This will reduce the burden of mental and physical ill health over the whole life course.</td>
<td></td>
</tr>
<tr>
<td>Our aim is to change how care is delivered and build it around the needs of children and young people and families. This means moving away from a system of care defined in terms of the services organisations provide to ensure that children and young people have easy access to the right support from the right service at the right time.</td>
<td></td>
</tr>
</tbody>
</table>
Caring for the most vulnerable
Current service constructs present barriers making it difficult for many vulnerable children, young people and those who care for them to get the support they need. Our aim is to dismantle these barriers and reach out to children and young people in need.

To be accountable and transparent
Far too often, a lack of accountability and transparency defeats the best of intentions and hides the need for action in a fog of uncertainty. Our aim is to drive improvements in the delivery of care, and standards of performance to ensure we have a much better understanding of how to get the best outcomes for children, young people and families/carers and value from our investment.

Developing the workforce
It is our aim that everyone who works with children, young people and their families is ambitious for every child and young person to achieve goals that are meaningful and achievable for them. They should be excellent in their practice and able to deliver the best evidenced care, be committed to partnership and integrated working with children, young people, families and their fellow professionals and be respected and valued as professionals themselves.

14.5 In keeping with the above within Future in Mind, locally we want to;

- Promote good mental health, build resilience and identify and address emerging mental health problems as soon as possible
- Ensure children, young people and families have timely access to evidence based support and treatment when in need
- Improve the experience and outcomes for the most vulnerable and disadvantaged children, ensuring they are adequately supported at key transition points
- Work in partnership to develop multi-agency pathways underpinned by quality performance standards, which are reported in a transparent way.
- Implement robust governance structures to oversee this transformation process that incorporate the voice of the child, family and community
- Continue to train and develop our local workforce to ensure we have staff with the right mix of knowledge, skills and competencies to respond to needs of children and young people and their families.
15 Engagement and Partnership

15.1 A communication and engagement strategy is being developed to support implementation of this plan, which will include children and young people. An outline summary is detailed in Appendix 2.

14.6 A whole system approach will be needed to achieve the best outcomes in an efficient and sustainable way. This means health organisations, local councils, schools, youth justice and the voluntary sector working together with children, young people and their families.

16 National Evidence of Effective Interventions

16.1 There is a growing evidence-base for a range of interventions which are both clinically and cost effective.

16.2 The National Institute for Health and Clinical Excellence (NICE) has produced a number of detailed clinical guidelines to guide intervention in mental health problems occurring in children and young people.

16.3 Importantly, both the model of interventions used (e.g. CBT, medication, family therapy) and the way the clinician works in collaboration with a family or young person (the therapeutic or working alliance) can have a significant effect on clinical outcomes. Thus services need to be commissioned and designed in such a way that allows full provision of evidence-based interventions as well as facilitating the development of good therapeutic relationships.\(^8\)

16.4 Any changes implemented as part of this transformation plan will be planned and commissioned as integrated, multi-agency services with care pathways that enable the delivery of effective, accessible, holistic evidence-based care, underpinned by the principles of Children and Young People’s Improving Access to Psychological Therapies (CYP IAPT) Programme promoting evidence based practice with services rigorously focused on delivering outcomes for our children, young people and families.

17 Strategic Clinical Network

17.1 The Strategic Clinical Network will focus on priority service areas to bring about improvement in the quality and equity of care and outcomes of their population, both now and in the future.

17.2 As an example, the Strategic Clinical Network Perinatal Mental Health Working Group, supported by the Maternity Clinical Advisory Group, has been established to develop guidance for health professionals with regard to promoting women’s mental health and wellbeing during the perinatal period. This working group has developed

\(^8\) Joint Commissioning Panel for Mental Health; Guidance for Commissioners of Children and Adolescent Mental Health Services
a service specification and aims to gather simplistic data which will identify further need.

17.3 The Clinical Commissioning Groups will take the opportunity to link into the Strategic Clinical Network Perinatal Mental Health Working Group for guidance to develop services to provide seamless support, to ensure women receive co-ordinated and continuous care.

18 Towards a Model of Transformation

18.1 In line with the principles within *Future in Mind*, the South Tees Children and Young Peoples Mental Health and Wellbeing Transformation Plan support the principle of developing a system to work for children, young people and their families. This means placing the children and their family ‘at the centre’ of what we do; regardless of the current tiered service model.

18.2 Echoing what young people have told us, any re-design will be co-produced with children, young people and families, as well as stakeholders. We will also build on previous partnership working between the statutory and voluntary sector and mental health services to support the transformation process.

19 Achieving Parity of Esteem between Mental Health and Physical Health

19.1 Parity of esteem is the principle by which mental health must be given equal priority to physical health. It was enshrined in law by the Health and Social Care Act 2012.

19.2 In our society mental health does not receive the same attention as physical health. People with mental health problems frequently experience stigma and discrimination, not only in the wider community but also from services. This is exemplified in part by lower treatment rates for mental health conditions and an underfunding of mental healthcare relative to the scale and impact of mental health problems.

19.3 This plan contributes to the NHS ambition to put mental health on a par with physical health, in the following ways:

- **Access to services** - Appropriate waiting times must be established so that children and young people with mental health problems know the maximum waiting time for treatment as individuals with physical health problems do.

- **Parity of treatments** - Many psychological therapies are National Institute for Health and Clinical Excellence (NICE) approved and recommended but the NHS Constitution does not entitle people to them in the same way we are entitled to National Institute for Health and Clinical Excellence (NICE) approved drugs.

- **Access to crisis care** - Children and young people using mental health services have 24/7 access to a crisis support.

---

9 Achieving Parity of Esteem between Mental Health & Physical Health
20  Our Initial Priorities

20.1 As this is a five-year plan, a phased approach is to be adopted, with priorities being re-visited on an annual basis, and will be informed by feedback from children and young people and their parents/carers and latest policy guidance.

20.2 At the core of this plan is building capacity and capability across the system so that we make measurable progress towards closing the health and wellbeing gap and securing sustainable improvements in children and young people’s mental health outcomes by 2020.

20.3 Overall priorities within the first phase of the plan are included in table below. It should be noted that some priorities will be specific to a locality area rather than South Tees wide.

<table>
<thead>
<tr>
<th>Future in Mind Theme</th>
<th>High level objective</th>
<th>Identified local priority</th>
<th>What will success look like</th>
</tr>
</thead>
</table>
| Promoting resilience, prevention and early intervention | Promote good mental health, build resilience and identify and address emerging mental health problems as soon as possible | Improve access to perinatal mental health care | • Access to newly commissioned Community Perinatal Mental Health Service  
• Recognition and intervention to prevent deterioration of mental health  
• Improved outcomes for the women and their family  
• Reduced need for specialist inpatient treatment which is provided in Morpeth |
| Attachment work to enhance bond between parent and child, avoid early trauma and help build resilience and improve behaviour | | • Increase in the number of professionals trained  
• Increase in the numbers of parents referred into emotional health support services e.g. IAPT |
| Support the 0-19 age range in relation to system change, service redesign and developing integrated multi agency pathway | | • Services are accessible and delivered in a timely manner  
• Children and young people are satisfied with services |
<table>
<thead>
<tr>
<th><strong>Future in Mind Theme</strong></th>
<th><strong>High level objective</strong></th>
<th><strong>Identified local priority</strong></th>
<th><strong>What will success look like</strong></th>
</tr>
</thead>
</table>
|                          | Develop points of access where children and young people and families can access appropriate support inclusive of peer support, information and guidance | • Services designed through co-production with children and young people and families  
• More children and young people will have access to peer support | Improve access to bereavement care for children and young people  
• More children and young people who have been bereaved will have access to timely support  
• Children and young people are able to cope |
| **Improving access to effective support – a system without tiers** | Ensure children, young people and families have timely access to evidence based support and treatment when in need | Implement access and waiting time standards for children and young people with eating disorders  
• More children and young people will access to the Community Eating Disorder Service  
• Implementation of waiting time standards  
• Reduced potential for in-patient admission | Ensure access to mental health crisis support and intervention, in line with principles within the Crisis Care Concordat  
• The most vulnerable young people are supported and receive emergency intervention when required  
• Comprehensive assessment for children and young people in crisis within 4 hours of referral  
• Young people receive community based support as close to home as possible  
• Positive impact on hospital admissions (unintentional and deliberate injuries; mental health) |
<table>
<thead>
<tr>
<th>Future in Mind Theme</th>
<th>High level objective</th>
<th>Identified local priority</th>
<th>What will success look like</th>
</tr>
</thead>
</table>
|                      | Review need and impact of intensive home treatment and explore most effective model of service delivery (potentially linked with the crisis service model) for children and young people with complex needs | Proactive follow-up of children, young people or their parents who do not attend (DNA) appointments | • Care in settings that is acceptable to individual and their parent/carer  
• Admission avoidance (when appropriate)  
• Intensive support and continuity of care post discharge from inpatient treatment to other services (facilitate stepped care) |
| Care for the most vulnerable | Improve the experience and outcomes for the most vulnerable and disadvantaged children, ensuring they are adequately supported at key transition points | Optimise model of specialist care and support for Looked After Children and Children in Need, including those with complex behavioural and mental health needs | • Reduced percentage of children and young people who Do Not Attend in CAMHS  
• Looked after children and children in need have timely access to services and appropriate interventions  
• Reduction in number of placement breakdowns |
|                      | | Support for young carers | • Raised awareness of support available for young carers  
• Development of Young Carer Champions  
• Young carers identified in schools |
| Accountability and transparency | Implement robust governance structures to oversee this transformation process that incorporate the voice of the child, family and community | Establish locality implementation groups to coordinate engagement with children and young people through a variety of means; and to monitor progress against the Transformation Plan, including risk | • Young People are experts by experience and there should be no service about them, without them  
• Publication of an annual report setting out key achievements, areas for improvement and further action required |
<table>
<thead>
<tr>
<th>Future in Mind Theme</th>
<th>High level objective</th>
<th>Identified local priority</th>
<th>What will success look like</th>
</tr>
</thead>
</table>
| Developing the workforce | Continue to train and develop our local workforce to ensure we have staff with the right mix of knowledge, skills and competencies to respond to needs of children and young people and their families | Training in universal settings including Primary Care | • Parents/carers and professionals in universal settings are more confident and able to respond to emotional and mental health needs and are clear about when and how to access additional help  
• Network of Mental Health Youth Champions  
• Reduction in number of non-accepted CAMHS referrals |
|                      |                      | Embedding principles of the CYP IAPT programme | • CYP-IAPT dashboard data to demonstrate needs are being met; what services users think of their support  
• To be ranked in highest quartile when national benchmarking undertaken |

## 21 Collaborative Commissioning

21.1 South Tees Clinical Commissioning Group already commissions a number of services with Hartlepool and Stockton-on-Tees Clinical Commissioning Group and both local authorities.

21.2 It is the aspiration, over the duration of this plan, to develop a specific collaborative commissioning model for children and young people’s mental health and wellbeing. This will support local joining up services between the Clinical Commissioning Group, local authorities and other partners, enabling all areas to accelerate service transformation.

21.3 Across the South Tees, agreement has been reached via the South Tees Integration Executive group to establish a joint commissioning group for children’s services, and this also reports via the Children’s Trust to the Health and Wellbeing Board in each locality. The membership of the group includes; South Tees Clinical Commissioning Group (supported through North of England Commissioning Support (NECS); Tees, Esk and Wear Valleys NHS Foundation Trust (TEWV); Redcar and Cleveland and Middlesbrough Councils with representation from education, public health and social care; Voluntary and Community Sector representation (VCS); and Adult Social Care.

21.4 This group is tasked with identifying and implementing joint or integrated commissioning opportunities in the areas of mental health and Special Educational
Needs and Disabilities. Called “READY TO ACHIEVE”, the group focuses on commissioning that will support children and young people to access education and achieve their potential.

22 Investment

22.1 The level of investment by all local partners commissioning children and young people’s mental health services for the period April 2014 to March 2015 is shown below. It is acknowledged that there are a number of commissioned services that will contribute to children and young people’s mental health and wellbeing. However, unless commissioned solely for that purpose, they have been excluded from that shown in the table.

South Tees Clinical Commissioning Group has been awarded an additional £608,737 per year to spend on supporting the implementation of this transformation plan. Of this, £173,771 per year has been specifically allocated by the government to establish or develop a local eating disorder service. Use of the remainder is for local discretion, with further funding yet to be allocated to support improvements in perinatal mental health care.

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>£173,771</td>
<td>£434,966</td>
<td>£608,737</td>
</tr>
</tbody>
</table>

We aim to use this additional resource to best effect, to fund local priorities which will help deliver improved outcomes for our local population. A breakdown of the costings is provided in the executive action plan in Appendix 3.

The total plan spend is above the allocation in order to provide agreed priorities in case of slippage.

### Governance

Accountability for delivery of locality integrated action plans lie with the respective multi-agency Health and Wellbeing Boards.

A draft governance framework is shown below;

23.3 Work is underway to identify which existing bodies would best fulfil the roles of the implementation/delivery groups in each locality, and how to establish a South Tees-wide forum for sharing of progress and constructive mutual assurance. However, the ultimate accountability would remain with the Health and Wellbeing Boards and the Governing Body of NHS South Tees Clinical Commissioning Group.
24 **Performance**

24.1 A performance framework will be developed to support implementation of this transformation plan.

24.2 Measurable key performance indicators will be agreed to enable monitoring of progress and demonstrate improved outcomes. This will for part of the assurance process required by NHS England.

24.3 Indicators may include, but not limited to:

- Process outcomes – activity (including accepted and non-accepted referrals), waiting times;
- Evidence based routine outcome measures showing improvements in emotional wellbeing of children and young people receiving services;
- In-patient acute hospital admissions for self-harm among young people;
- In-patient admissions to specialist services (Tier 4);
- Numbers of NEETs among young people in contact with mental health services;
- Feedback from children and your people and their families on experience of services.

25 **Equity and Health and Inequalities**

25.1 Promoting equality and addressing health inequalities is central to this transformation plan.

25.2 This transformation aims to uphold the principles within *Future in Mind* which include ensuring those with protective characteristics such as learning disability are not excluded.

25.3 An Equality Impact Assessment will accompany this plan.

26 **Executive Action Plan**

26.1 An executive action plan is detailed in Appendix 3. As this is *living* document it will be subject to change as the plan develops.

Background

This transformation plan outlines the communications approaches for local implementation of recent guidance from Department of Health *Future in Mind*: Promoting, protecting and improving our children and young people’s mental health and emotional wellbeing, for which there is therefore a need to communicate and share information in a timely effective way.

This plan will be reviewed and developed by the North of England Commissioning Support (NECS) communications team on behalf of each Clinical Commissioning Group (CCG) and localised as appropriate following any at scale regional or national activity and taking account of the local authority engagement and communications, as well as any emerging outcomes of activity which informs best practice and any lessons learned.

The ‘Future in Mind’ document is clear in its vision that ‘more of the same is simply not an option’. An increased focus on prevention, building resilience, promoting good mental health and early intervention across the whole system will make real change to children and young people’s mental health and emotional wellbeing. There is a need to reduce risk factors associated with poor mental health at individual and community level; improve the mental health and emotional wellbeing of children and young people and to reach out to the groups at greatest risk of poor mental health.

There is a commitment to joined-up working between community and voluntary, statutory and business sectors; commitment to engagement and consultation with local community, children, young people and families; commitment to achieving and sharing evidence based practice; population and targeted approach to delivering the strategy.

Successful implementation of the plan will result in:

- An improvement in children and young people’s mental health and emotional wellbeing;
- Multi-agency approaches to working in partnership, promoting the mental health of all children and young people, providing early intervention and also meeting the needs of children and young people with established or complex problems;
- All children, young people and their families will have access to mental health care based upon the best available evidence and provided by staff with an appropriate range of skills and competencies.

Communications Approach

The broad approach to communications handling will be as follows.

1. A local approach to developing handling plans and key messages and where appropriate at scale, using syndicated information for each Clinical Commissioning Group to adapt and use locally, based on key milestones of the implementation and assurance timescale.
2. There will be an at scale approach to sharing, developing and learning from best practice across Clinical Commissioning Group and local authority areas.

3. Each Clinical Commissioning Group will be responsible for developing communicating and engaging their own local stakeholders as set out in their plans submitted to NHS England and working closely with each local authority. They will work collaboratively and pro-actively with other partners to anticipate and respond to emerging concerns and issues.

Local commissioners and provider organisations will handle their own local communications with their key stakeholders. There are well established networks and ways of working between communications professionals in the region.

**Local Policy Context**

- This transformation plan contributes to the delivery of local priorities detailed within Joint Health and Wellbeing Strategies, local Clinical Commissioning Group’s Clear and Credible Plans for 2012-17, supports local mental health strategies and is aligned to mental health and autism spectrum disorders and the North East and Cumbria Learning Disability Fast Track Transformation Programme.

**Key Messages**

In keeping with the *Future in Mind*, local commissioners want to:

- Promote good mental health, build resilience and identify and address emerging mental health problems as soon as possible;
- Ensure children, young people and families have timely access to evidence based support and treatment when in need;
- Improve the experience and outcomes for the most vulnerable and disadvantaged children, ensuring they are adequately supported at key transition points;
- Work in partnership to develop multi-agency pathways underpinned by quality performance standards, which will be reported in a transparent way;
- Continue to train and develop our local workforce to ensure we have staff with the right mix of knowledge, skills and competencies to respond to needs of children and young people and their families;
- Multi-agency stakeholders are working in partnership across the health and social care sector to implement these plans locally.

**Plan Development**

NECS communications and engagement team, with local authority partners.
Stakeholders and Audiences

Key Stakeholders

- Children, young people, their families and carers
- Children and Adolescent Mental Health Services groups
- Children and Adolescent Mental Health Services – clinical staff
- Children and Young People’s Delivery Partnerships
- Children’s Trusts
- Clinical Commissioning Group Executives
- Clinical Commissioning Group Governing Body
- Clinical Networks
- Health and Wellbeing Boards
- Health and Wellbeing Executives
- Learning Disability Network North East & Cumbria
- Local Authorities
- NHS England – Offender Health
- NHS England – Specialist Commissioning
- NHS Providers (primary care, community services, acute care, specialist service providers such as learning disabilities) providing general and specialist health assessment, treatment and care for children and young people
- Private Providers
- Voluntary and Community Sector
- Youth Offending Service
The Clinical Commissioning Groups will review and develop their full stakeholder lists in relation to this plan to make sure that children, young people, carers and their families are communicated with at the right time, adhering to the key principle of co-production and towards developing and evolving their wider engagement plans.

Overview of Audiences

- **Individual/Family Advocates** - Third sector, user forums, individual family members with a vested interest in this transformation work.
- **Organisations Leading Service Re-design** – All commissioners across health care providers.
- **Staff** - Health care professionals delivering services.
- **NHS England’s Regional Teams** – Regional Directors, Transformation Leads, Directors of Commissioning Operations, Directors of Specialised Commissioning
- **Communications Leads** – Commissioners (health and social care including public health providers).
- **Influencers** - With a stated interest in children and young people including councillors, MPs, groups.
- **Local, Regional and National Communication Leads** - Local Authority and NHS commissioner and provider stakeholders, including NHS England’s core team and specialised commissioning.
- **Media** – Local, regional, national trade and national/local consumer.

Engagement and Partnership

Each Clinical Commissioning Group is developing consultation and engagement plans in partnership with each local authority to improve the involvement of children, young people, families, carers and wider stakeholders around improving mental health, emotional wellbeing and resilience. Activities include:

- Children and young people’s engagement events;
- Healthwatch survey and engagement;
- Young people’s youth councils;
- ‘Investors in Children’ agenda days;
- Parent support groups;
- Mental Health and Emotional Wellbeing network;
- School surveys.

Next steps involve developing a model of co-production with children and young people, parents/carers and other stakeholders to inform future plans throughout implementation. This will form the basis of a wider engagement plan.
Clinical Engagement

Local commissioners and provider organisations will handle their own local communications and staff engagement, as they would do with any service review or redesign. Messages and information will be provided proactively in keeping with the collaborative approach of the partners to ensure early awareness and the development of approaches on a wider footprint if appropriate and beneficial. The focus will be to ensure staff are informed and have the opportunity to contribute and engage at every stage.

The Clinical Commissioning Groups are currently exploring the development of a community of practice to facilitate wider regional discussion of issues and sharing of best practice relating specifically to children and young people’s mental health and emotional wellbeing.

Equality Impact Assessment

The reach and spread of engagement and communications linked to the programme will be reviewed at every opportunity (in line with the development of stakeholder mapping) to make sure that relevant groups and materials are included. Information will be provided in appropriate Easy Read and in Plain English formats under advice from relevant groups as to content, type and frequent.

Risks

<table>
<thead>
<tr>
<th>Risk</th>
<th>Mitigation</th>
</tr>
</thead>
</table>
| Slippage in agreeing or realising transformation plans. | • Clarity on sign-off process/ timeframe.  
• Potential to phase communication activity as transformation plans are agreed. |
| Lack of cohesion/consistency due to many partners / stakeholders and different roles. | • Clarity on roles/responsibilities for communications leads.  
• Agreed strategy/roles with overarching core collateral, key messages, frequently asked questions etc.  
• Close working across communications teams/identified leads in stakeholder organisations. |
| Lack of engagement or agreement from key local stakeholders on transformational plans. | Robust communications and engagement plans developed by local teams with handling (local or wider footprint) as required. |
| High profile influencers e.g. providers (or staff), not supportive and delay service re-design. | • Robust process for identifying and preempting operational issues with real-time updates for communications leads.  
• Clear process for handling responses, led locally but ensuring alignment with national messages. |
<table>
<thead>
<tr>
<th>Risk</th>
<th>Mitigation</th>
</tr>
</thead>
</table>
| Change for some individuals not managed well, supported or concern amongst families re: change. | • Early identification and management of potential operational issues.  
• Early notification from operational leads for communications leads to inform handling. |
| Destabilizes current providers; uncertainty amongst staff that impacts on quality of care. | • Programme messages reflected through operational discussions/meetings.  
• Once transformation plans are confirmed, clear messages on managed transition. |
| Change does not happen at a fast pace:                               | • Local leads ensure staff are engaged in any change process to maximise the potential for them to come on board and be accepting of any changes. |
  • Potential changes to staff terms and conditions, such as working hours.  
  • People resist shifts in power and control. |
| Not complying with national guidance and legislation – Care Act, Human Rights Act, Mental Capacity Act, Duty to Involve. Failure to work in accordance with principles of best practice. | • There is a commitment to the transformation programme from all parties.  
• There are internal processes to check compliance with the law. |

**Ways of Working and Roles**

The local communications team will make sure, with local authority colleagues, that information is formatted appropriately for the audience concerned. Key communications will build on existing communications plans (local authority, regional and national). There will be national and regional communications on this work. There will also be a process for feeding back key messages, local announcements and communications proactively across individual stakeholders and local networks to the communications team and health commissioners ensuring that proactive and reactive communications are tailored to local need.

*Confirmation of roles and responsibilities to follow.*

**Key Activity**

Work has already been started to consider what works best for each of the localities as part of the **stakeholder mapping** and plan development and local communications will build on this. This work will take place with local authority communications leads.

*Detail to follow.*

**Timescales**
This work relates to timelines starting earlier in the summer (2015) and an initial phase of work to end in March 2016. It will be adapted and developed to take on further additional timings for the longer term implementation of plans after this period.

**Current key milestones:**

- **September** – agree draft document
- **September to October** – engage key stakeholder groups, agree final plan
- **November** – ratification of plan with key stakeholder groups

Each plan will include a detailed list of stakeholder engagement groups and communications for local adaptation, including local health and wellbeing boards and other meetings where local implementation plans are being discussed. **Appendix A** includes an initial timescale for discussion and engagement at key groups as part of the whole system approach to consulting and engaging on these plans.

**Evaluation and Monitoring**

Suggested measures for monitoring by communications leads for review are:

- Digital – traffic (unique web visitors, bounce rates);
- Social media – commentary/sentiment;
- Traditional media – quantitative (coverage; coverage in primary titles); qualitative (sentiment, key messages);
- Engagement – stakeholder endorsement/commentary; ability to secure endorsement for key projects/initiatives; engagement levels in surveys (number, representation of key groups) etc.
**Appendix A:** Consultation Timeline for the Children and Young People’s Mental Health, Emotional Wellbeing and Resilience Plan 2015/20 in South Tees CCG areas.
